

LED-ALLIANCE LED Posters

LED-Alliance introduces a new poster-style LED video display with multiple innovations all in one:

- 1.875 mm for fine pixel pitch
- one of the largest pixel displays 320 x 1080
- brighter than most TV's at almost 1000 Nits, with extended grayscale, color range, and contrast
- built in media player with also an external HDMI input. Plug it in, turn it on, upload your videos or images, and let it run
- low-reflection polymer coating surface to protect the LED modules from impact damages and resists liquid spills, also allows light cleaning to the surface unlike traditional LED posters
- LAN networking WiFi control system with external WiFi antenna aids in strong and rapid communications from your phone or tablet to the unit via a user friendly control app. Nestled on the side of the power supply housing, the antenna is also protected from damage.
- CAT6 daisy-chaining, seamless connecting, multiple units can connect without visible seam to form a larger screen; link 6 units together for a freestanding, 1920 x 1080 viewing screen that is over 13 ½ feet diagonal!
- the design allows for easy movement on the removable wheeled base. Hanging compatible as well.

| | |
|--------------------------|----------------------------------------------------------------------------|
| Pixel Pitch (mm) | 1.875 mm |
| LED Type | SMD LED w/GOB Polymer Coating |
| Pixel Density (per sq m) | 284,444 |
| Viewing Angle (H/V) | 160 degree / 160 degree |
| Brightness (Nits) | >800 |
| Refresh Rate | >3840HZ. |
| Optimal viewing distance | 7' to 40' |
| Input voltage | 110 to 240 volts (auto adjusting) |
| Max Power usage | est 600W |
| Display size in pixels | 320 px W x 1080 px V |
| Display size WxHxD in | 24 ¼" W, 80" H no base / 84 1/8" w base, 3 5/8" D no base / 20" w base. |
| Display weight | 119 lbs with rolling base |
| Input interface | WiFi / Ethernet, HDMI, USB |
| Control App: | Magnimage YX600 (free) |
| Autolinking: | Standard |
| External video input: | HDMI |
| Still Images: | JPEG, PNG |
| Video Content | MP4 |
| Maintenance | Front service for modules |
